## XDV2

### BELTS CHARACTERISTICS

SECTION	38	48	58
a (mm)	9,5	12,7	15,9
s (mm)	5,5	7,2	9
weight (gr/m)	57	95	143
Working temperature	-20°C / +80°C		
Relevant antistatic standard	ISO 1813		
Materials	CR blend - aramid cord - cotton/polyester fabric		

XDV2 series belts are designed for maintenance-free operation in applications with exceptional hard working conditions.

### BELT FEATURES

- Trouble-free operation on the drives with small pulleys.
- Smooth power transmission due to the belts capacity to absorb power shock.
- Ideal for drives with power oscillations.
- Thanks to the high-grade of its materials the belt gives even better results when used with back-side idlers.
- Made with a strong cotton cover for long-lasting clutching transmissions.
- Low tolerances reduce drive vibrations and allow its use in single or multiple drive transmissions without any restrictions.
- Superior resistance to temperature, oil, and weather.
- Easily identified by its light grey coloured fabric.
- Comes in popular sizes (3/8", 1/2", 5/8").
- Meets requirements for static conductivity.

## XDV2 BELT DRIVES

The XDV2 belt has been created for drives that include small pulley diameters and high-temperature peaks, combined with a high-grade of moisture and humidity.

It withstands the harshest environmental requirements, such as oil and grease contaminated drives or transmissions where grits may interfere between the pulleys and the belt.

Thanks to its characteristics, the XDV2 perfectly matches the requirements of clutching drives as the aramid cord protects the belt against shock loads, all while maintaining its length constant.

XDV2 belts are used successfully in applications such as:

- Lawn movers
- Garden tillers
- Snow blowers
- Garden tractors
